Data Visualization

1. Sales Target Achievement by Category: Compare actual sales with sales targets by category using a clustered column chart.

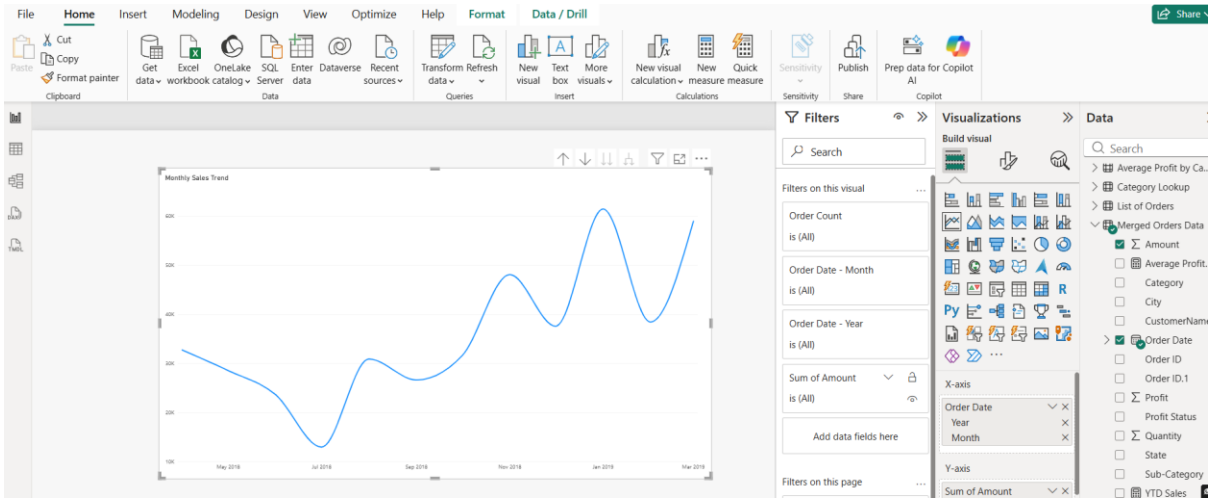

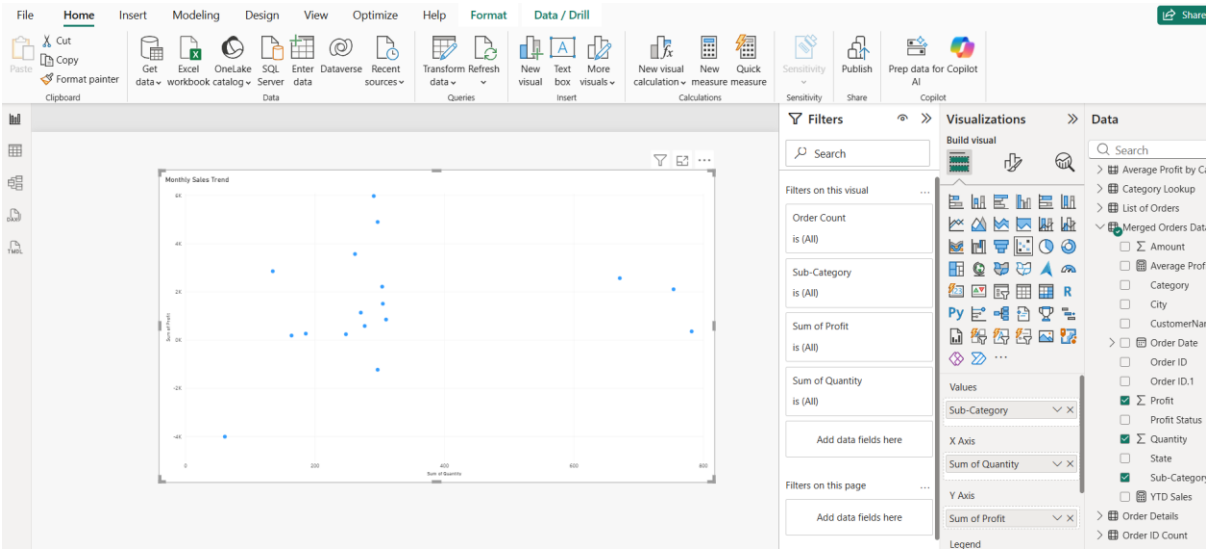

2. Max Profit Margin by Sub-Category: Analyze the maximum profit margin for each sub-category of products using a donut chart.

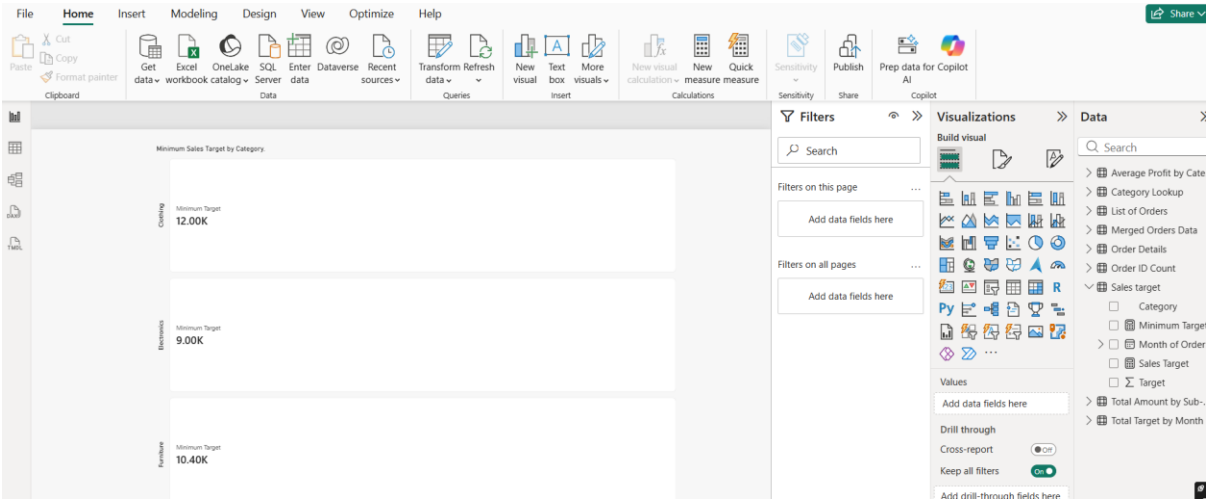

3. Monthly Sales Trend: Show the trend of monthly sales over time using a line chart.

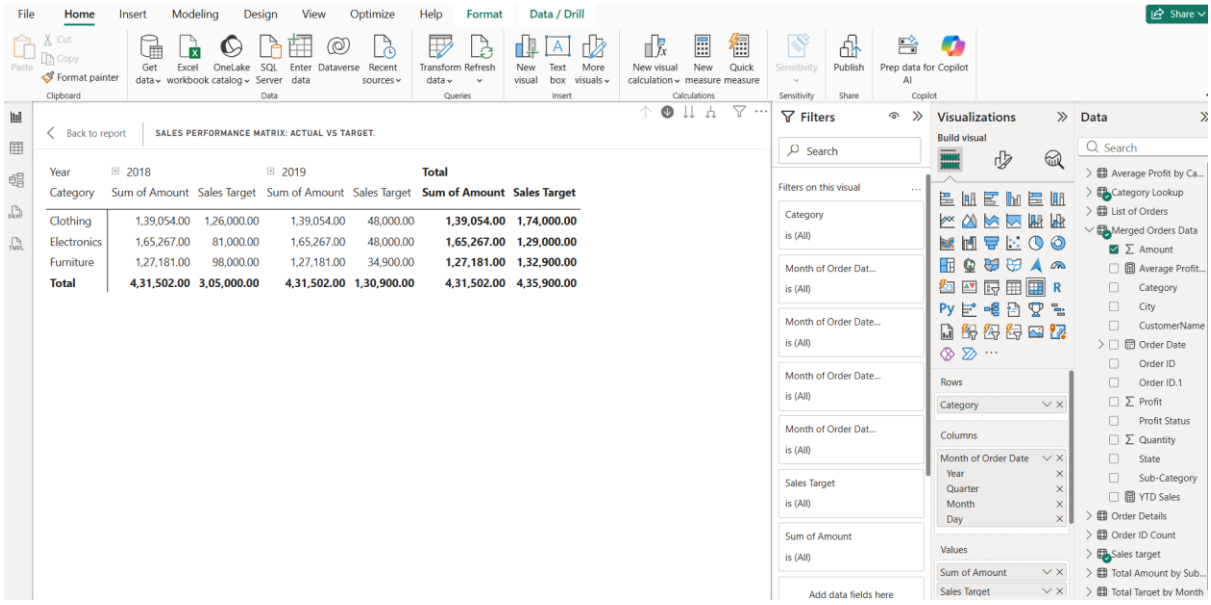

4. Comparison of Profit and Quantity by Sub-Category: Compare the relationship between profit and quantity sold for different sub-categories using a scatter chart.

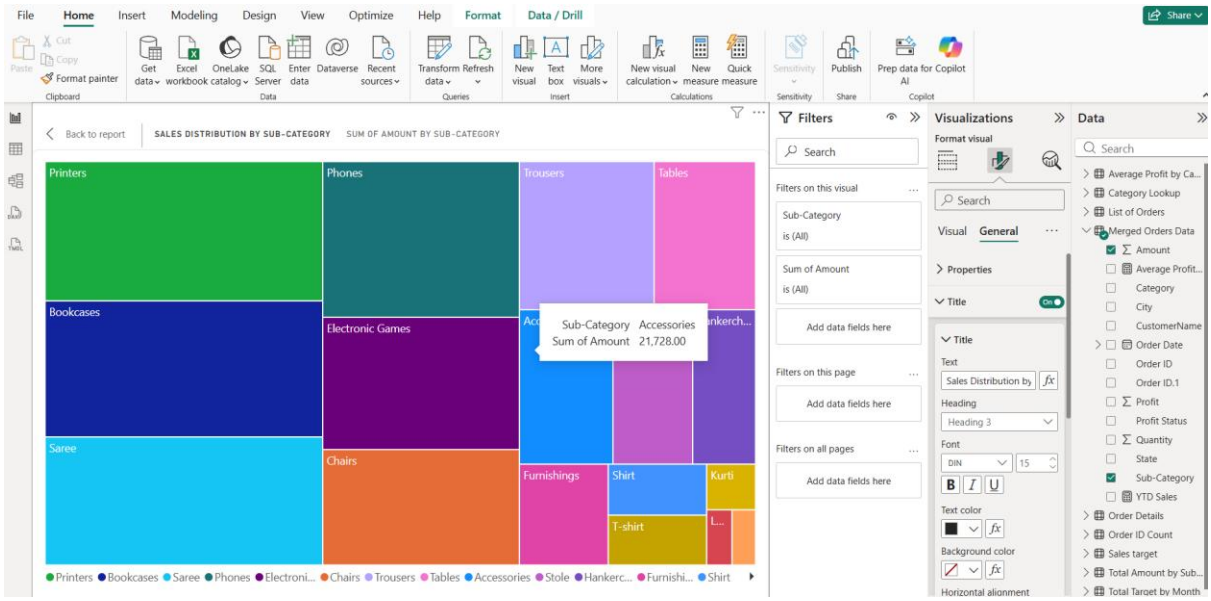

5. Comparison of Total Sales Amount and Target: Create cards to succinctly display the total sales amount alongside the sales target for quick comparison and analysis. Also, create a multi-row card to display the minimum target for each segment.

6. Sales Performance Matrix: Build a matrix view to analyze how actual sales compare to sales targets across different categories and months.

7. Sales Distribution by Sub-Category: Represent the sales distribution across different sub-categories using a treemap.

8. Order Count Analysis by State: Create a funnel chart to visualize the distribution of order counts across different states.
